

WHEN THE MISSION IS CRITICAL®

PMC POLLCONNECT

The PMC Wireless Poll Connect Solution ensures secure, reliable connectivity for election officials and IT teams, providing seamless access to real-time e-poll book data and secure voter information for poll workers. As electronic poll books (e-poll books) become the standard for election organizations, these digital tools house critical voter information, confirming voter registration and polling center locations. Ensuring easy access and protection of this sensitive data from unauthorized access or hacking is essential.

Key features include:

- **Remote Management:** NetCloud Manager enables secure management and monitoring of e-poll books across multiple locations.
- **Built-in Security:** Our zero-trust security model ensures device authentication, secure access to cloud applications, and protection of sensitive election data.
- **Redundancy:** Dual-SIM support at polling centers guarantees reliable connectivity with carrier redundancy to avoid disruptions.
- **Remote Software Updates:** Effortlessly deploy software updates remotely, ensuring continuous and efficient operations.

PMC Wireless Poll Connect Solution delivers a comprehensive, secure network environment, safeguarding election operations and securing voter information from external threats.

PMC Wireless Election Kit

PMC POLLCONNECT

This solution was designed so ePollbooks can share their data over a secure network and quickly download polling information. PMC PollConnect was developed with input from State and City election officials to give them the connectivity and security they need on Election Day and beyond.

Already deployed throughout the State of New Jersey and the City of Philadelphia, PollConnect by PMC leverages the Ericsson/Cradlepoint NetCloud management platform and has become a proven winner on Election Day.

Key Benefits of PMC PollConnect

- Enable ePollbooks to connect to each other on election day via WiFi
- Ability to restrict internet access during elections
- Quickly upload incremental updates to voter rolls prior to polls opening
- Ability to get up to the minute voter registration updates so provisional ballots are reduced
- Ability to upload voter data instantly once the polls close
- Establish a secure connection to all of the voter locations to make polls more efficient and reduce waiting times
