AN EASTERN COMMUNICATIONS COMPANY

WHEN THE MISSION IS CRITICAL®

PMC Starlink Vehicle Solution

RELIABLE CONNECTIVITY FOR WHEREVER THE MISSION TAKES YOU.

Cellular networks don't always reach where the work takes you. During emergencies, damaged infrastructure, network congestion, or remote locations can make staying connected even more difficult.

Powered by PARSEC and connected by Ericsson, PMC Starlink Solutions are purpose-built to keep teams connected when traditional networks fall short. PMC designs, integrates, configures, deploys, and supports the complete solution, giving organizations one trusted partner instead of a collection of disconnected technologies.

CONNECTIVITY THAT MOVES WITH THE MISSION.

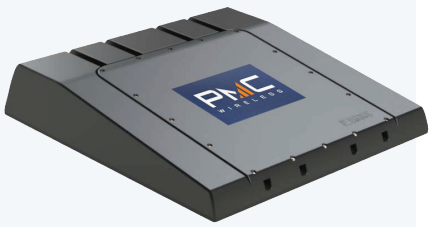
Some missions never stay in one place. Whether teams are responding to an emergency, coordinating operations, or working across a large service area, communications need to move with them.

The PMC Starlink Vehicle Solution provides reliable cellular and satellite connectivity in a permanently integrated mobile platform, helping vehicles stay connected wherever the job takes them.

DESIGNED FOR

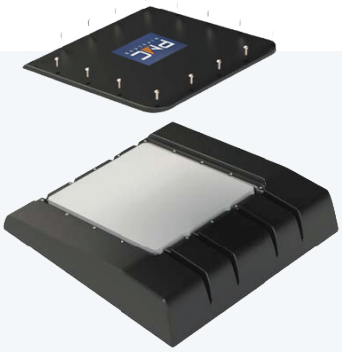
- Public safety vehicles
- Emergency response fleets
- Utility service vehicles
- Transportation operations
- Field service teams
- Mobile command units

WHY THE PERFORMANCE KIT?



Built for the Road

Designed for vehicles that depend on reliable communications throughout the workday.



Always Connected

Provides continuous cellular and satellite connectivity while teams are on the move or operating in the field.

Mission-Ready Integration

A fully integrated mobile communications solution built to support the way field teams actually work.

building reliable communications takes more than great technology

Reliable communications depend on every part of the system working together. PMC integrates satellite and cellular connectivity with the networking technology required to make the complete system work in the field. PMC also handles installation, configuration, and ongoing support.

Instead of buying the pieces and figuring out the integration later, you get a system designed to work together from day one.

BUILT FOR THE REAL WORLD

PMC Starlink Solutions are built for environments where reliable communications have an operational impact:

PUBLIC SAFETY

LAW ENFORCEMENT

FIRE & EMS

EMERGENCY MANAGEMENT

UTILITIES

TRANSPORTATION

GOVERNMENT

CRITICAL INFRASTRUCTURE

Teams may be responding to an emergency or operating beyond dependable cellular coverage. They may need connectivity for a temporary command post or a vehicle in the field. In every case, they need reliable access to the people and information they depend on.

WHY ORGANIZATIONS CHOOSE PMC

Built Around the Mission
Every deployment is different. PMC helps determine the right technology based on where your teams operate and how they need to stay connected.

Integrated From the Start
PMC integrates the complete system from the start so customers aren't left managing disconnected components.

Multiple Paths to Connectivity
Cellular and satellite connectivity give organizations another option when coverage conditions change or normal infrastructure becomes unavailable.

Proven Technology Partners
Each solution features Parsec antenna technology and Ericsson Cradlepoint routing technology integrated by PMC.

LET'S BUILD THE RIGHT SOLUTION FOR YOUR MISSION.

Tell us how and where your teams need to stay connected. We'll help you determine the right PMC Starlink Solution.
